Letters in Mathematical Physics **56:** 321–322, 2001.

Contents of Volume 56 (2001)

Volume 56 Nos. 1–3 April–June 2001

Special Issue Devoted to Papers Submitted at the

EUROCONFÉRENCE MOSHÉ FLATO 2000

Dijon, France, 11–14 September 2000

Parts I–III

Edited by Giuseppe Dito and Daniel Sternheimer

Part I – April 2001

GIUSEPPE DITO and DANIEL STERNHEIMER / Preface 1

ALAIN CONNES and DIRK KREIMER / From Local Perturbation Theory to Hopf and Lie Algebras of Feynman Graphs 3–15

ALAN WEINSTEIN / Poisson Geometry of Discrete Series Orbits, and Momentum Convexity for Noncompact Group Actions 17–30

JONATHAN WEITSMAN / Non-Abelian Symplectic Cuts and the Geometric Quantization of Noncompact Manifolds 31–40

MURRAY GERSTENHABER, ANTHONY GIAQUINTO and MARY E. SCHAPS / The Donald–Flanigan Problem for Finite Reflection Groups 41–72

CHRISTIAN FRØNSDAL / Retrospective on Quantization 73–84

Part II – May 2001

DMITRY TAMARKIN and BORIS TSYGAN / Cyclic Formality and Index Theorems 85–97

YAN SOIBELMAN / Quantum Tori, Mirror Symmetry and Deformation Theory 99–125

GILLES HALBOUT / Formality Conjectures and Deformation 127–140

BORIS SHOIKHET / Vanishing of the Kontsevich Integrals of the Wheels 141–149

IVAN T. TODOROV / Two-Dimensional Conformal Field Theory and Beyond. Lessons from a Continuing Fashion 151–161

ALBERTO S. CATTANEO and GIOVANNI FELDER / On the AKSZ Formulation of the Poisson Sigma Model 163–179

Part III – June 2001

LEON A. TAKHTAJAN / Free Bosons and Tau-Functions for Compact Riemann Surfaces and Closed Smooth Jordan Curves. Current Correlation Functions 181–228

MIKHAIL V. KARASEV / Quantum Surfaces, Special Functions, and the Tunneling Effect 229–269

MAXIM KONTSEVICH / Deformation Quantization of Algebraic Varieties 271–294

YURI I. MANIN / Theta Functions, Quantum Tori and Heisenberg Groups 295–320
